MISSOURI RIVER.

MISSOURI RIVER.

ALMOST 23,000 CARLOADS OF TEXAS OIL

It Is Estimated That Beaumont Has Produced 12,000,000 Gallons Up to Date.

REPUBLIC SPECIAL Beaumont, Tex., April 3.—The month of March has witnessed important improve ments in the Beaumont oil fields in sev-

ments in the Beaumont off fields in several directions. More gushers have been brought in than during any previous month. Heretofore the record for one month was twenty-six, but thirty-nine spouters were added during March, making a total of 213 in the field.

With one day's oil shipments not reported, the month shows total shipments of 4.658 cars or 754.64 harrels of oil, and the total will likely be more than 4.800 cars.

The record of shipments of previous months is as follows:

Cars. Barrels.

Totals ..... .. 18,071 3,492,274

Added to the incomplete report of ship-ments for March, this makes total ship-ments from the field of 22,729 cars, or 4,246,-738 barrels. If the cars that carried this oil could have been made into one train they would have extended for a distance of 173 miles. The quantity of oil shipped does not represent the quantity taken from the ground by any means. There is now 5,000,000 bar-rels of oil stored in tanks, and enough has

rels of oil stored in tanks, and enough has been wasted to run the amount taken from the ground up to 12,000,000 barrels.

March has also been a record-breaking month for the completion of storage tanks. The number of barrels of storage completed is not obtainable, but it is known to be larger than that of any previous month. The building of pipe lines has also been active. Another line to Port Arthur is about completed, and many short lines have been built, including one from the field to Beaumont.

When the record for March shipments is completed it will show a gain of about 20 per cent over those of February. April shipments should show a still greater gain, since shipping facilities are improving rapidly.

A gasser drilled on block 22 of the Keith-

A gasser drilled on block 22 of the Keith-Ward tract by Contractor Wynn seems to lose none of its force, though it has been spouted several times daily since it was drilled in about ten days ago. The contractor honed that repeated spouting of the well would bring it in as an oil gusher, but it has so far failed to produce oil.

The total number of shares of oil stock disposed of on the Beaumont Oil Exchange during March was 1,578,535, against 2,346,499 for February.

OIL BRIQUETTES AT BEAUMONT. Fuel Purposes.

Fuel Purposes,

Beaumont oil magnates are now considering the utilization of the mass of settlings found in fuel oil tanks after the pure product has been drawn off and shipped to market. At the famous oil fields of telku. Rusela, this residuum is made into what are knowledge, this residuum is made into what are knowledge, the state of the control o

presses and squeeze the mass at heavy pressure until there is no appearance of gream. Several of the largest Beaugont companies are figuring upon forming a company between them to utilize material that has been going to waste and which is expected to prove profitable.

Petroleum. Petroleum.
